1. Restriction to one of the following inventions is required under 35 U.S.C. 121:

I. Claims 1 and 8-11, drawn to a data storage apparatus, classified in class 360, subclass 97.02.

II. Claims 2-7, drawn to a data storage apparatus, classified in class 360, subclass 97.01.

The inventions are distinct, each from the other because of the following reasons:

2. Inventions I and II are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention I has separate utility such as "a high pressure zone in an upstream direction from the actuator and a low pressure zone in a downstream direction from the actuator", "induction vent", "exhaust vent", "passage". See MPEP § 806.05(d).

3. Because these inventions are distinct for the reasons given above and the search required for Group I is not required for Group II, restriction for examination purposes as indicated is proper.

4. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

5. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim

remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
